CONSERVATION HAS A NICE RING TO IT™

PATENTED DESIGNS ON ALL PRODUCTS

QUICK INSTALLATION

2-piece design snaps together in seconds. **Easy retrofit to existing plantings.**

EFFECTIVE

Reduce water consumption and prevent erosion.

NATURAL LOOKING

Earth tone finish blends seamlessly into existing landscapes.

STRONG AND DURABLE

Commercial-grade design with rigid teeth for direct burial that anchors firmly in the ground.

Water is our single most valuable resource on this planet. Landscape irrigation accounts for 50%-60% of total residential water usage. It is well known that a significant amount of that water never makes it to our plants and trees rather it runs down slopes, driveways, sidewalks and roadways. Using our patented water delivery system helps prevent water waste and promote healthy growth in plantings.

WATER CONSERVATION SYSTEM FOR TREES AND SHRUBS

- Slow and controlled water absorption promotes healthy development and accelerated growth of new and existing plantings.
- Reduce water usage up to 50% by eliminating wasteful runoff and surface evaporation.
- Subterranean well channels water deep into root ball and prevents slope and soil erosion.
- Made with recycled plastics qualifying for points on LEED projects. 
- Compatible with all other manufacturers' drip irrigation systems.
- Easy 2-piece field assembly retrofits in minutes to existing landscapes.
- Factory assembled drip tubing and 5 GPH pressure compensating emitters included.
- Fill or cover with mulch, bark, rock or any other landscape material to blend into the landscape.
- Acts as a barrier to prevent intrusion from grass, weeds or groundcover keeping the area around the tree or shrub clear of invasive growth.

IT'S THE IRRIGATION RING THAT PREVENTS SOIL EROSION WHILE TARGETING AND SAVING WATER

ACCESSORIZE!

LANDSCAPE LIGHT

LED Up light snaps seamlessly
into channel

Highlight your landscape with out warm-hue,
easy to install LED light.

HW-1920 | Landscape Light (7W LED, 3500K)

OTHER PRODUCTS AVAILABLE:

PRESS-FIT CHECK VALVE

Just Press into any standard pipe fitting
to **prevent backflow**.

Available in sizes: 1/2" | 3/4" | 1" | 1 1/2" | 2"

Patented design installs in any standard pipe
fitting turning it into a check valve in seconds.
Reduce installation costs and save time by
using this revolutionary product throughout
your irrigation system.

HW-1800	Press-Fit Check Valve 1/2"
HW-1805	Press-Fit Check Valve 3/4"
HW-1810	Press-Fit Check Valve 1"
HW-1815	Press-Fit Check Valve 1.5"
HW-1820	Press-Fit Check Valve 2"

PUMP PROTECTOR

Conserve Energy and protect your pump
from blockage and dry run.

Conserve energy and save your pump from
burn-out with Pump Protector. A unique solution
to energy conservation and pump protection.

- Automatic device shuts the pump off in
blockage situations and prevents dryrun
thus saving your pump from burn-out.
- Easily retrofits to existing pumps equipped
with a corded connection.
- Certified for outdoor use.
- Makes your pump automatic.
- Works with pumps from 1/10 HP to 3 HP.

WATER RING SPECS

Dimensions:

HW-2510/2511 | 25" OD X 22" ID X 6" H
HW-2010/2011 | 20" OD X 17" ID X 6" H

Water Capacity:

HW-2510/2511 | 5 gallons
HW-2010/2011 | 3 gallons

Max System Pressure: 50 PSI

Flow Rate:

HW-2510 | 3 pressure compensating 5GPH emitters included, with an option for 6 emitters.
HW-2010 | 2 pressure compensating 5GPH emitters included, with an option for 4 emitters.

Tubing: 17mm Drip Tubing

Ring Material: Recycled thermoplastic resin with UV inhibitors.

Product Weight:

HW-2510 | 5 lbs
HW-2010 | 3.5 lbs

Available Models:

HW-2510 | Water Ring, 25" with 5 GPH drip system
HW-2511 | Water Ring, 25" w/out drip system
HW-2010 | Water Ring, 20" with 5 GPH drip system
HW-2011 | Water Ring, 20" w/out drip system
